

# FEB VACATION CAMP

## **Intro to Broadcasting with the iPad**

8:30AM – 11:30 AM \$75

What better way to learn about the news than to create your own broadcast! Together we will create our own nightly news, using the iPad camera to film and “iMovie” to edit. Learn about the key roles in the newsroom while you explore the basics of script writing, reporting, lighting and shooting. You can add a creative spin to the broadcast by pretending to be someone else while you read the news. By the end of the week we will be able to see our hard work come to life as we watch our own broadcast. Who knows, maybe we’ll see a broadcast featuring Wildstyle from the Lego movie reporting with Ferb, from Phineas and Ferb!

## **Digital “APP SMASHED” News**

12:00PM – 3:00PM \$75

Traditional printed newspapers are flat and one dimensional, but in this class we’ll be using iPads to take it up a few notches! Join us while we create our very own digital, interactive newspaper. This week we will be learning about the basic sections of the newspaper as well as different ways to create and design newspaper content. We will use the app Book Creator as the starting point of the project and will introduce a variety of other apps to create our news stories. “APP SMASHING” comes into play when you use the apps all together. For example: you could draw a picture using Paper 53, bring that picture into Explain Everything to be animated, and then export it as a movie to placed back into Book Creator.

**After submitting your registration you will receive an email within 24 hours confirming your spot and giving you details on where to send your payment.**

**Full Day option:** Students taking both classes will have a lunch break in school cafeteria from 11:30-12:00. Students must bring a lunch and drink from home.
